SUNSHINE COAST CLEAN AIR SOCIETY
www.cleanaironthecoast.com

The Clean Air Society received a grant from the SCRD for an educational symposium on clean air. This will take place Saturday, May 2nd at the Seaside Centre. Please put this on your calendar.

Part of the symposium includes holding a science contest in the Sunshine Coast high schools. There will be three prizes for the science students who come up with the best ideas/inventions to keep and improve the quality of our air. The focus of these inventions/ideas, too, includes behavior change. What can each of us do to make sure our air stays clean?

We need a volunteer(s) who will coordinate with the science teachers on this contest. If you have a science background, if you're an educator, if you believe in supporting budding scientists, if you believe in involving youth in an educational effort such as this, please get in touch with Elizabeth at: em2elizabeth@gmail.com Involving our youth is a big part of this symposium.

There's room for another Director on our Board. If you have the time and want to work on clean air issues or have questions of what's involved, please contact Elizabeth. We keep the number and length of meetings to a minimum and do most of our business via email.

Thank you for any help you can offer.
